Treasurer's Report:-

Sorry I cannot make it again today ...

The bank is looking pretty stable due to sales being up on same time last year as you can tell with the Bar Sales being up. Now we just need to settle down, enjoy the new look club and make/save money.

The make over of the club has now been completed (??) so there won't be or shouldn't be any further big payments for this. Moving forward things should be getting back to some form of normal and things should start to settle which in turn should lead to more people returning to the club, fingers crossed.

Is there any sort of breakdown that shows the Pension lunches and the Sunday brunches are worth it? And having the live music, are we getting the added patronage to cover that payment? I do think that the live music is a fantastic idea though.

I would also like to ask why we have no opening bar or clothing stock for April this year but we have closing stock - and it would appear to be the reverse (opening but no closing) - last year??

Moved – Corinne Tucker
